Strathmore University Management Board is closely monitoring the unfolding global and continental situation in regard to the spread of COVID-19. Where necessary, we will continue to adjust our internal policies in response to this rapidly evolving situation.

The safety of our staff and students is paramount and the University is keen that this is not compromised. All Staff members and students are hereby advised that all international trips are postponed effective Monday, March 16th until May 31st 2020. This affects among others, trips to conferences, workshops and trainings that had been scheduled unless Management revises this precautionary measure of prudence.

Please note that:

1) For any staff member embarking on a trip deemed to be very critical, approval will be sought from the Director, People & Culture through their respective heads of department and/or division.

2) For staff and students returning recently from World Health Organization hotspot countries or have been exposed to someone from those countries, they should liaise with the Strathmore University Medical Centre (via the Hotline Number below) for guidance on protocols for self-quarantine and other relevant information through:

   Hotline: 0701 668 193
   Email: sumedicalcentre@strathmore.edu
   Website: https://sumc.strathmore.edu/

3) All events within the University that involve incoming visitors, visiting professors and external partners from World Health Organisation listed hotspot countries have been postponed until further notice.

Let us continue to pray for all countries affected by the coronavirus pandemic.

Thank You

Prof. John Odhiambo
Vice Chancellor
